LONDON:

PRINTED AND PUBLISHED BY HIS MAJESTY'S STATIONERY OFFICE.

To be purchased directly from H.M. STATIONERY OFFICE at the following addresses:

Adastral House, Kingsway, London, W.C.2; 120, George Street, Edinburgh;

York Street, Manchester; 1, St. Andrew's Crescent, Cardiff;

15, Donegall Square West, Belfast;

or through any Bookseller.

1929.

Price 9d. net.

## EXPLANATORY STATEMENT.

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c. The live births and deaths for the towns in Tables III., V. and VI. have been provisionally corrected by the exclusion of those not belonging to the town and as far as possible by the inclusion of those belonging to the town but occurring in other areas. These figures may not correspond exactly with the revised figures published later in the Statistical Review.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

---

Table I. shows, for England and Wales, the Marriages, Births and Deaths for the 10 years preceding, and for each quarter of those years.

Table II. shows the Annual Rates calculated on the above.

Table III. shows the Birth and Death Rates, and Analysis of Mortality during the last 5 quarters, in (a) England and Wales, (b) 107 County Boroughs and Great Towns, and (c) Smaller Towns with adjusted populations 20,000-50,000 in 1921.

Table IV. shows the Births, Deaths (distinguishing deaths of Infants under one year) in the Quarter under review for Administrative Counties with the Associated County Boroughs, and Table IVa. the Marriages in the preceding Quarter in England and Wales by Registration Counties.

Table V. shows, for the 107 County Boroughs and Great Towns and the Metropolitan Boroughs, the Births and Deaths (distinguishing certain causes and those of Infants under one year) and the corresponding annual rates for the 13 weeks ended 30th March, 1929.

Table VI. shows, for the 156 Smaller Towns, the Births and Deaths (distinguishing certain causes and those of Infants under one year) for the quarter ended 31st March, 1929.

Table VII. shows the Births and Deaths (distinguishing certain causes) and death-rates in London and in certain cities in the British Empire and in foreign countries, in the last available quarter.

Table VIII. is a summary of returns of Notified cases of Infectious Diseases for the 13 weeks ended 30th March, 1929. These figures are included in the present publication by arrangement with the Ministry of Health, in pursuance of Section 5 of the Census Act, 1920.

Table VIIIA. shows the local distribution of the cases of small-pox notified during the 13 weeks ended 30th March, 1929.

*Note*.—The returns for the quarters ending 30th June and 31st December respectively contain lists of the changes of boundaries of administrative and poor law areas during the six months ending on these dates, that for the quarter ending 30th September tables relating to summer mortality from diarrhoea and enteritis, and that for the quarter ending 31st December a summary of certain figures for the year.

## NOTES ON THE FIRST QUARTER OF 1929.

## ENGLAND AND WALES.

*Births.*

The live Births registered in the *First Quarter* of 1929 numbered 160,181 and were 4,512 more than in the preceding Quarter, but 7,745 below the number recorded in the corresponding Quarter of 1928. The illegitimate live Births totalled 7,350, or 51 more than the number shown in the Return for the First Quarter of 1928.

Of these 160,181 live Births 82,047 were males and 78,134 females giving a proportion of 1,050 males to 1,000 females; the average proportion in the 10 preceding First Quarters was 1,048.

The live Births registered in the Quarter correspond to an annual rate of 16·5 per 1,000 of the estimated mid-year population for the year 1928, or 0·6 per 1,000 below that recorded in the corresponding Quarter of 1928.

The number of Stillbirths, the corresponding annual rate per 1,000 population, and the percentage of the total Births registered during the last seven Quarters are shown below.

Quarter.	Number.	Annual rate per 1,000 population.	Percentage of total births registered.
Sept., 1927 ...	6,198	0·63	3·6
Dec. " ...	6,388	0·65	4·0
March, 1928 ...	7,077	0·72	4·0
June " ...	7,126	0·73	4·0
Sept. " ...	6,617	0·67	3·8
Dec. " ...	6,747	0·68	4·2
March, 1929 ...	6,891	0·71	4·1

*Deaths.*

The Deaths (excluding stillbirths) registered numbered 204,293 and were 88,654 more than in the preceding Quarter, and 67,978 more than in the corresponding Quarter of 1928. They comprised 99,985 of males and 104,308 of females, a proportion of 959 males to 1,000 females. The death-rate was 21·0 per 1,000 of the estimated population which was 7·1 per 1,000 above that recorded during the first Quarter of last year and, with the one exception of the March quarter of 1919 when owing to the great influenza epidemic the rate was 21·3, this is the highest rate recorded in any First Quarter of the present century. It was due in a large measure to influenza and also to the high mortality from respiratory and circulatory diseases occurring during the spell of abnormally cold weather experienced throughout the country in February and early March.

Influenza was stated to be either an immediate or contributory cause of death in 23,763 cases, or 11·63 per cent. of the total deaths registered, whereas in the previous epidemic in the March Quarter of 1927 the figures were 17,931 and 10·62 respectively.

The Mortality of infants under one year of age was equal to 111 per 1,000 registered live births. This rate was 14 per 1,000 above the average of the 10 preceding First Quarters, and is the highest rate recorded in any Quarter since the First Quarter of 1919.

### Urban Mortality.

The highest death-rates from certain epidemic diseases in the 107 Great Towns (Table V.) last quarter were as follows :—

From *measles* 1·29 in Cardiff, 1·42 in St. Helens, and 1·59 in Sunderland; from *whooping cough* 1·65 in Oldham, 1·84 in West Hartlepool, 2·09 in Stockton-on-Tees, and 2·36 in Warrington; from *diphtheria* 0·50 in East Ham, 0·52 in Walsall and 0·67 in Gillingham; from *influenza* 4·18 in Norwich, 4·32 in Stoke-on-Trent, 4·39 in Doncaster, 4·41 in Leeds, 4·42 in Worcester, 4·84 in Walsall and 5·99 in Oldham.

The highest death-rates per 1,000 Births from *diarrhœa and enteritis* among children under two years of age were 20·4 in Manchester, 20·5 in Stockton-on-Tees and 46·3 in Salford.

### Small-pox.

During the Quarter small-pox was mentioned as a cause of death in 8 cases, all of which have been provisionally classified to small-pox. In addition to the 3 and 2 deaths mentioned in the footnotes to Tables V. and VI. respectively, 1 death each has been assigned to Mossley U.D. (Lancashire), St. Asaph R.D. (Flint), and Strood R.D. (Kent).

A supplementary table (VIIIa.) showing the distribution of the cases of small-pox notified during the 13 weeks ended 30th March, 1929, is given on pp. 24 to 26.

### NATURAL INCREASE OR DECREASE.

The natural *decrease* of population by excess of Deaths over Births was 44,112 against a natural increase of 43,386 in the corresponding quarter of 1926, a decrease of 1,786 in 1927, and an increase of 31,611 in 1928.

### NOTES ON MARRIAGES.—Fourth Quarter, 1928.

The number of *persons* married in the *Fourth* quarter of 1928 in England and Wales was 156,910, a decrease of 31,896 over the number in the preceding Quarter and 10,248 less than that in the corresponding quarter of 1927. The number corresponds to an annual rate of 15·8 per 1,000 of the estimated mid-year population, or 1·1 less than that recorded in the corresponding Quarter of 1927.

### UNITED KINGDOM AND IRISH FREE STATE.—

#### Third Quarter, 1928.

In Great Britain and Ireland 210,430 births and 119,503 deaths were registered in the three months ended 30th September, 1928. The natural increase in population was therefore 90,927. The number of persons married was 218,554.

For facts, in detail, concerning Scotland, Northern Ireland, and the Irish Free State, reference should be made to the Returns published by their respective Registrars-General.

**METEOROLOGY.\*****JANUARY 1929.**

The weather during January was on the whole quiet, very cold and mainly dry with a conspicuous paucity of westerly and south-westerly winds. A remarkable feature was the persistent and pronounced coldness of the month, the first really cold January since 1917; at Richmond (Kew Observatory) the month was the coldest January since 1895. In several districts in central and eastern England the temperature failed to rise above the freezing point on the 5th, 6th, 7th and 16th, the temperature at Leafield remaining below 32°F. from the 5th to the 9th inclusive. Severe ground frost occurred frequently. Mild conditions, however, prevailed temporarily about the 10th in western districts and generally on the 19th and 20th and during the last few days of the month. The general precipitation over the country amounted to 71 per cent. of the normal. Apart from widespread precipitation on the 9th and some heavy rain in the south-west on the 22nd, precipitation was unimportant up to the 27th, after which rain fell daily, heavy falls occurring locally. Precipitation occurred frequently in the form of snow, particularly during the period 5th to 9th and about the 16th and 27th. There was in general a slight excess of sunshine in the western districts, but in eastern and central districts there was a pronounced deficiency. There were 22 sunless days at Croydon, 19 at Gorleston (Yarmouth) and 17 at Liverpool.

**FEBRUARY.**

The outstanding feature of the weather of February was the intense cold which prevailed from the 11th to the 17th, the severest experienced generally since the great frost of February 1895. During the early part of the month the weather was mainly unsettled with frequent, though, as a rule, not heavy, precipitation. Except in the western districts where conditions were rather mild, temperatures were generally moderate to rather low. On the 11th the greater part of Great Britain came under the influence of cold winds off the Continent. During the period 11th to 16th snow fell frequently, while temperature remained continuously below freezing point over large areas and in some eastern districts the frost lasted up to the 20th. Screen minima below 10°F. were fairly numerous from the 12th to the 16th. On the 14th the temperature in the screen fell to 1°F. below zero at Ross-on-Wye and Usk. Amongst the lowest temperatures recorded on the grass were -8°F. at Ross-on-Wye on the 14th, -2°F. at Hampstead (London) on the 15th and 0°F. at Oxford on the 16th. Rivers, canals and lakes were generally frozen over. Thousands of homes were affected through their domestic water supplies becoming frozen.

After the 14th there was a gradual rise in temperature in the south-west, and following heavy snow on the 15th and 16th day temperatures generally rose above freezing point on the 17th and from the 21st to 23rd mild conditions prevailed generally with considerable fine periods in the south-east. There was a renewal of east winds and a return to less severe wintry conditions on the 24th.

---

\* Furnished by the Director of the Meteorological Office.

The general precipitation over the country amounted to only 49 per cent. of the normal. Sunshine aggregates for the month were decidedly below the normal in almost all districts.

### MARCH.

Anticyclonic conditions prevailed throughout the greater part of the month and the weather was on the whole quiet, sunny and abnormally dry with, however, much mist or fog at night and in the early morning, and frequent ground frost. Apart from rather low day temperatures in the south at the beginning of the month and widely from the 12th till about the 17th and in eastern England on the 19th, the days were warm, notably about the 9th and from the 27th to the 30th, the temperature reaching the abnormally high level for March of 70°F. and over at several stations during the latter period. At Oxford the maximum temperature of 70°F. on the 28th and 29th and 72°F. on the 30th were the highest recorded in March since observations commenced there in 1851. On several nights clear skies and absence of wind favoured the occurrence of low screen temperature and severe ground frost, and during each of the days 8th to 11th a daily range of temperature in excess of 35°F. was recorded in many districts, temperature rising above 60°F. during the day and falling below 30°F. during the night. The mean temperature for the month was above the normal almost everywhere. The month was abnormally dry and along a broad coastal strip in the north-east and over much of the central and eastern districts of England less than 10 per cent. of the normal rainfall was recorded. At several stations all previous March records for dryness were eclipsed, and at Richmond (Kew Observatory) the month's total, 0.6 mm., is the lowest monthly total ever recorded since 1866. Sunshine totals exceeded the normal in almost all districts, over 10 hours being recorded widely from the 8th to the 11th and the 27th to 30th.

**ENGLAND and WALES.**—VALUES of AIR TEMPERATURE, RAINFALL and SUNSHINE for the FIRST QUARTER of 1929, expressed as deviations from or percentages of the normal values, for the several Districts.

\* Excluding non-civilians.

† The populations relate to 1929, except in the case of Belfast, which is the Preliminary Census figure of 1928, yearly estimates having been discontinued. Deaths in Edinburgh and Glasgow are provisionally corrected by the deduction of deaths of non-residents domiciled in Scotland and by the addition of deaths of residents reported from elsewhere in Scotland. Births are similarly corrected. Deaths in Dublin Registration Area and Belfast are corrected by the exclusion of deaths of persons admitted into public institutions from without the respective areas, and in the case of Belfast by the inclusion of certain institutional deaths occurring elsewhere. The figures for Edinburgh and Glasgow relate to the calendar quarter.

\$ As altered 1st October, 1928.

† Including one death from small-pox in Greater London (Finsbury).

Table VI.—156 SMALLER TOWNS } POPULATION, BIRTHS, and DEATHS for Quarter  
(Adjusted populations 20,000- } ended 31st December, 1929.

To be purchased directly from H.M. STATIONERY OFFICE at the following addresses:

Adastral House, Kingsway, London, W.C.2; 120, George Street, Edinburgh;

York Street, Manchester; 1, St. Andrew's Crescent, Cardiff;

15, Donegall Square West, Belfast;

or through any Bookseller.

1929.

Price 9d. net.

## EXPLANATORY STATEMENT.

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c. The live births and deaths for the towns in Tables III., V. and VI. have been provisionally corrected by the exclusion of those not belonging to the town and as far as possible by the inclusion of those belonging to the town but occurring in other areas. These figures may not correspond exactly with the revised figures published later in the Statistical Review.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

---

Table I. shows, for England and Wales, the Marriages, Births and Deaths for the 10 years preceding, and for each quarter of those years.

Table II. shows the Annual Rates calculated on the above.

Table III. shows the Birth and Death Rates and Analysis of Mortality during the last 5 quarters, in (a) England and Wales, (b) 107 County Boroughs and Great Towns, and (c) Smaller Towns with adjusted populations 20,000-50,000 in 1921.

Table IV. shows the Births, Deaths (distinguishing deaths of Infants under one year) in the Quarter under review for Administrative Counties with the Associated County Boroughs, and Table IVa. the Marriages in the preceding Quarter in England and Wales by Registration Counties.

Table V. shows, for the 107 County Boroughs and Great Towns and the Metropolitan Boroughs, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) and the corresponding annual rates for the 13 weeks ended 29th June, 1929.

Table VI. shows, for the 157 Smaller Towns, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) for the quarter ended 30th June, 1929.

Table VII. shows the Births and Deaths (distinguishing certain causes) and death-rates in London and in certain cities in the British Empire and in foreign countries, in the last available quarter.

Table VIII. is a summary of returns of Notified cases of Infectious Diseases for the 13 weeks ended 29th June, 1929. These figures are included in the present publication by arrangement with the Ministry of Health, in pursuance of Section 5 of the Census Act, 1920.

Table VIIIa. shows the local distribution of the cases of small-pox notified during the 13 weeks ended 29th June, 1929.

*Note*.—The returns for the quarters ending 30th June and 31st December respectively contain lists of the changes of boundaries of administrative and poor law areas during the six months ending on these dates, that for the quarter ending 30th September tables relating to summer mortality from diarrhoea and enteritis, and that for the quarter ending 31st December a summary of certain figures for the year.

## NOTES ON THE SECOND QUARTER OF 1929.

## ENGLAND AND WALES.

*Births.*

The live Births registered in the *Second* Quarter of 1929 numbered 169,612 and were 9,431 more than in the preceding Quarter, but 1,385 below the number recorded in the corresponding Quarter of 1928. The illegitimate live Births totalled 7,726, or 27 more than the number shown in the Return for the Second Quarter of 1928.

Of these 169,612 live Births 86,731 were males and 82,881 females giving a proportion of 1,046 males to 1,000 females; the average proportion in the 10 preceding Second Quarters was 1,045.

The live Births registered in the Quarter correspond to an annual rate of 17·2 per 1,000 of the estimated mid-year population for the year 1928, or 0·2 per 1,000 below that recorded in the corresponding Quarter of 1928. With the exception of that recorded in 1919, this rate is the lowest recorded in the Second Quarter of the year since the establishment of civil registration.

The number of Stillbirths, the corresponding annual rate per 1,000 population, and the percentage of the total Births registered during the last seven Quarters are shown below.

Quarter.	Number.	Annual rate per 1,000 population.	Percentage of total births registered.
Sept., 1927 ...	6,198	0·63	3·6
Dec. " ...	6,388	0·65	4·0
March, 1928 ...	7,077	0·72	4·0
June " ...	7,126	0·73	4·0
Sept. " ...	6,617	0·67	3·8
Dec. " ...	6,747	0·68	4·2
March, 1929 ...	6,891	0·71	4·1
June " ...	6,917	0·70	3·9

*Deaths.*

The Deaths (excluding stillbirths) registered numbered 118,761 and were 85,532 less than in the preceding Quarter, and 4,013 more than in the corresponding Quarter of 1928. They comprised 61,448 males and 57,313 females, a proportion of 1,072 males to 1,000 females. The death-rate was 12·1 per 1,000 of the estimated population or 0·4 per 1,000 above that recorded during the second Quarter of last year.

Influenza was stated to be either an immediate or contributory cause of death in 3,464 cases, or 2·92 per cent. of the total deaths registered, whereas in the preceeding Quarter the proportion was 11·63 per cent.

The Mortality of infants under one year of age was equal to 62 per 1,000 registered live births. This rate was 7 per 1,000 below the average of the 10 preceding Second Quarters.

### Urban Mortality.

The highest death-rates from certain epidemic diseases in the 107 Great Towns (Table V.) last quarter were as follows :—

From *enteric fever* 0·29 in West Hartlepool; from *measles* 0·69 in Bootle, 0·83 in Liverpool, 1·24 in West Bromwich, 1·26 in West Hartlepool and 1·50 in Sunderland; from *whooping cough* 0·52 in Aberdare, 0·68 in Walsall, 0·69 in Chester and 0·75 in Warrington; from *diphtheria* 0·28 in Ipswich, 0·30 in Coventry and 0·36 in Carlisle; from *influenza* 0·76 in St. Helen's, 0·91 in Merthyr Tydfil, 1·03 in Hastings and 1·04 in Aberdare.

The highest death-rates per 1,000 Births from *diarrhœa and enteritis* among children under two years of age were 19·2 in Burnley, 21·0 in Salford and 25·8 in Wakefield.

### Small-pox.

During the Quarter small-pox was mentioned as a cause of death in 25 cases, 24 of which have been provisionally classified to small-pox. In addition to the 15 and 7 deaths mentioned in the footnotes to Tables V. and VI. respectively, 1 death each has been assigned to Sale U.D. (Cheshire) and Bentley with Arksey U.D. (Yorks. W.R.).

A supplementary table (VIIIa.) showing the distribution of the cases of small-pox notified during the 13 weeks ended 29th June 1929, is given on pp. 24 and 25.

### NATURAL INCREASE OR DECREASE.

The natural *increase* of population by excess of Births over Deaths was 50,851 as against increases of 67,523, 63,183, and 56,249 in the Second Quarters of 1926, 1927 and 1928.

### NOTES ON MARRIAGES.—First Quarter, 1929.

The number of *persons* married in the *First* quarter of 1929 in England and Wales was 108,632, a decrease of 48,278 on the number in the preceding Quarter but 18,218 more than that in the corresponding quarter of 1928. The number corresponds to an annual rate of 11·2 per 1,000 of the estimated mid-year population, or 2·0 above that recorded in the corresponding Quarter of 1928.

### UNITED KINGDOM AND IRISH FREE STATE.— Fourth Quarter, 1928.

In Great Britain and Ireland 198,910 births and 145,575 deaths were registered in the three months ended 31st December, 1928. The natural increase in population was therefore 53,335. The number of persons married was 183,970.

For facts, in detail, concerning Scotland, Northern Ireland, and the Irish Free State, reference should be made to the Returns published by their respective Registrars-General.

**METEOROLOGY.\***

APRIL, 1929.

April was, on the whole, a cold month with a preponderance of northerly to easterly winds and a pronounced deficiency of precipitation. Apart from a brief spell of warm weather from the 16th to the 19th, when temperature reached or exceeded 70°F. locally in eastern and south-eastern districts, temperature both by day and night was mostly below normal. Screen minima below freezing point were recorded in many inland places on the 6th, 17th, 21st and 22nd. Ground frost occurred frequently at night and in several districts was often severe; amongst low minima recorded on the grass were 9°F. at Rhayader on the 21st, 10°F. at Marlborough and 15°F. at Durham and Rothamsted on the 22nd. The general precipitation over England and Wales amounted to 57 per cent. of the normal and in parts of the south and south-west monthly totals amounted to only one third of the normal. Some snow or hail occurred mostly in northern districts and in London, snow or sleet fell on the evening of the 11th. Sunshine aggregates exceeded the normal in western districts and were in general below the normal elsewhere. There were, however, frequent bright periods, abundant sunshine being recorded on the 6th, 7th, 19th and from the 21st to the 23rd. Over 12 hours' sunshine were recorded in many southern districts on the 19th and at Lympne (Kent) 13 hours' sunshine were recorded daily on the 21st and 22nd.

**MAY.**

The weather during the first half of May was mainly cool and unsettled with heavy rain from the 4th to the 8th and occasional thunderstorms but with considerable bright periods. The morning of May 1st was decidedly cold, the temperature in the screen falling to 24°F. at Durham, 26°F. at Cambridge and 27°F. at Rothamsted. Strong winds were experienced in exposed places on the 5th, 6th, 13th and 14th, the wind reaching gale force locally in coastal districts on the 6th. On the 16th anticyclonic conditions became established and apart from heavy rain in western and south-western districts on the 22nd and 23rd and local thunderstorm rains on the 24th, 26th and 27th, the remainder of the month was almost rainless. In central and eastern districts, warm sunny weather prevailed and on the 23rd the temperature exceeded 80°F. in several districts, a maximum of 81°F. being recorded as far north as York on that date. In the west and north the highest temperatures, ranging generally from 70°F. to 75°F., were attained on the 27th or 28th. During the last few days of the month, north easterly winds brought dry cool weather to most districts but in the south-west much rain was experienced from the 27th to the 30th. The mean temperature for the month was above the normal in northern districts and about normal in southern districts. Monthly totals of precipitation exceeded the normal in south and south-west of England and the greater parts of Wales; elsewhere they were in general below the normal. Monthly aggregates of bright sunshine were in general above the normal, notably in north-western, central and eastern districts. During the week 19th to 25th, 93 hours' bright sunshine were recorded at Gorleston, a daily average of 13.3 hours.

---

\* Furnished by the Director of the Meteorological Office.

## JUNE.

Notwithstanding an excess of bright sunshine in most districts, especially in the west, June 1929 was cool. Although unsettled weather during the first two weeks brought welcome rain, the second half of the month was almost rainless and except in parts of Wales, Devon and Cornwall there was a deficiency in the total rainfall for the month which was most pronounced in the east and south-east; Shoeburyness had only 30 per cent. of the normal total for the month, Chelmsford and Raunds 31 per cent. and Manchester 38 per cent. Over England and Wales the general precipitation for the month amounted to 62 per cent. of the normal. Day temperatures were often below the normal owing to the prevalence of cool winds from between west and north and rather cold nights were experienced from about the 5th to the 9th and from the 25th to the 29th. Warm sunny weather occurred about the 11th and 18th. More than 15 hours' bright sunshine was recorded at a few places on the 9th, 10th and 11th and on the 18th and 19th and day temperatures rose above the normal, 76°F. being recorded at Hull and Lympne on the 12th and 83°F. at Greenwich and 82°F. at Norwich on the 19th. The onset of northerly winds after the 23rd brought cool weather which persisted with little interruptions in the in the east until the end of the month; in the west the last few days of the month were generally warm and sunny.

\* Excluding non-civilians.

† The populations relate to 1929, except in the case of Belfast, which is the Preliminary Census figure of 1926, yearly estimates having been discontinued. Deaths in Edinburgh and Glasgow are provisionally corrected by the deduction of deaths of non-residents domiciled in Scotland and by the addition of deaths of residents reported from elsewhere in Scotland. Births are similarly corrected. Deaths in Dublin Registration Area and Belfast are corrected by the exclusion of deaths of persons admitted into public institutions from without the respective areas, and in the case of Belfast by the inclusion of certain institutional deaths occurring elsewhere. The figures for Edinburgh and Glasgow relate to the calendar quarter.

‡ Including 7 deaths from small-pox.

§ As altered 1st October, 1928.

|| Including 6 deaths from small-pox.

## EXPLANATORY STATEMENT.

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c. The live births and deaths for the towns in Tables III., V. and VI. have been provisionally corrected by the exclusion of those not belonging to the town and as far as possible by the inclusion of those belonging to the town but occurring in other areas. These figures may not correspond exactly with the revised figures published later in the Statistical Review.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

---

Table I. shows, for England and Wales, the Marriages, Births and Deaths for the 10 years preceding, and for each quarter of those years.

Table II. shows the Annual Rates calculated on the above.

Table III. shows the Birth and Death Rates, and Analysis of Mortality during the last 5 quarters, in (a) England and Wales, (b) 107 County Boroughs and Great Towns, and (c) Smaller Towns with adjusted populations 20,000–50,000 in 1921.

Table IV. shows the Births, Deaths (distinguishing deaths of Infants under one year) in the Quarter under review for Administrative Counties with the Associated County Boroughs, and Table IVa. the Marriages in the preceding Quarter in England and Wales by Registration Counties.

Table V. shows, for the 107 County Boroughs and Great Towns and the Metropolitan Boroughs, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) and the corresponding annual rates for the 13 weeks ended 28th September, 1929.

Table VI. shows, for the 157 Smaller Towns, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) for the quarter ended 30th September, 1929.

Table VII. shows the Births and Deaths (distinguishing certain causes) and death-rates in London and in certain cities in the British Empire and in foreign countries, in the last available quarter.

Table VIII. is a summary of returns of Notified cases of Infectious Diseases for the 13 weeks ended 28th September, 1929. These figures are included in the present publication by arrangement with the Ministry of Health, in pursuance of Section 5 of the Census Act, 1920.

Table VIIIa. shows the local distribution of the cases of small-pox notified during the 13 weeks ended 28th September, 1929.

*Note* :—The returns for the quarters ending 30th June and 31st December respectively contain lists of the changes of boundaries of administrative and poor law areas during the six months ending on these dates, that for the quarter ending 30th September a table relating to summer mortality in London from diarrhoea and enteritis, and that for the quarter ending 31st December a summary of certain figures for the year.

## NOTES ON THE THIRD QUARTER OF 1929.

### ENGLAND AND WALES.

#### *Births.*

The live Births registered in the *Third* Quarter of 1929 numbered 163,929 and were 5,683 less than in the preceding Quarter, and 1,746 below the number recorded in the corresponding Quarter of 1928. The illegitimate live Births totalled 7,317, or 78 less than the number shown in the Return for the Third Quarter of 1928.

Of these 163,929 live Births 83,489 were males and 80,440 females giving a proportion of 1,038 males to 1,000 females; the average proportion in the 10 preceding Third Quarters was 1,049.

The live Births registered in the Quarter correspond to an annual rate of 16·4 per 1,000 of the estimated mid-year population for the year 1929, or 0·3 per 1,000 below that recorded in the corresponding Quarter of 1928. It is the lowest rate recorded in any third quarter, being 0·1 below that of 1927, the lowest previously reached.

The number of Stillbirths, the corresponding annual rate per 1,000 population, and the percentage of the total Births registered during the last eight Quarters are shown below.

Quarter.	Number.	Annual rate per 1,000 population.	Percentage of total births registered.
Sept., 1927 ...	6,198	0·63	3·6
Dec. " ...	6,388	0·65	4·0
March, 1928 ...	7,077	0·72	4·0
June " ...	7,126	0·73	4·0
Sept. " ...	6,617	0·67	3·8
Dec. " ...	6,747	0·68	4·2
March, 1929 ...	6,891	0·71	4·1
June " ...	6,917	0·70	3·9
Sept. " ...	6,559	0·66	3·8

#### *Deaths.*

The Deaths (excluding stillbirths) registered numbered 96,759 and were 22,002 less than in the preceding Quarter, but 3,044 more than in the corresponding Quarter of 1928. They comprised 50,248 males and 46,511 females, a proportion of 1,080 males to 1,000 females. The death-rate was 9·7 per 1,000 of the estimated population or 0·3 per 1,000 above that recorded during the third Quarter of last year.

The Mortality of infants under one year of age was equal to 54 per 1,000 registered live births. This rate was 6 per 1,000 below the average of the 10 preceding Third Quarters.

### Urban Mortality.

The highest death-rates from certain epidemic diseases in the 107 Great Towns (Table V.) last quarter were as follows :—

From *enteric fever* 0·17 in West Hartlepool; from *measles* 0·25 in Bootle, 0·26 in Liverpool, 0·27 in Dudley, 0·28 in Wakefield, 0·36 in Tynemouth and 0·38 in Bradford; from *whooping cough* 0·20 in Chester, 0·23 in Ipswich, 0·32 in Norwich and 0·48 in Walsall; from *diphtheria* 0·20 in Coventry, 0·25 in Merthyr Tydfil and 0·34 in Wimbledon; from *influenza* 0·24 in Middlesbrough, 0·26 in Exeter, 0·30 in Stockton-on-Tees and 0·31 in Gloucester.

The highest death-rates per 1,000 live Births from *diarrhœa* and *enteritis* among children under two years of age were 25·1 in Birmingham, 30·7 in West Hartlepool, 31·0 in Gateshead, 33·2 in Hull and 49·8 in Sunderland.

### Small-pox.

During the Quarter small-pox was mentioned as a cause of death in four cases, which have been provisionally classified to small-pox and assigned to Bethnal Green Met. B., Stepney Met. B. (2) and Willesden U. D.

A supplementary table (VIIIa.) showing the distribution of the cases of small-pox notified during the 13 weeks ended 28th September, 1929, is given on pp. 24 and 25.

### NATURAL INCREASE OR DECREASE.

The natural *increase* of population by excess of Births over Deaths was 67,170 as against increases of 84,132, 71,616, and 71,960 in the Third Quarters of 1926, 1927 and 1928.

### NOTES ON MARRIAGES.—Second Quarter, 1929.

The number of *persons* married in the *Second* quarter of 1929 in England and Wales was 150,964, an increase of 42,332 on the number in the preceding Quarter but 18 612 less than that in the corresponding quarter of 1928. The number corresponds to an annual rate of 15·3 per 1,000 of the estimated mid-year population, or 2·0 below that recorded in the corresponding Quarter of 1928.

### UNITED KINGDOM AND IRISH FREE STATE.—

#### First Quarter, 1929.

In Great Britain and Ireland 204,166 births and 252,353 deaths were registered in the three months ended 31st March, 1929. The decrease of population owing to the excess of deaths over births was therefore 48,187. The number of persons married was 131,546.

For facts, in detail, concerning Scotland, Northern Ireland, and the Irish Free State, reference should be made to the Returns published by their respective Registrars-General.

**METEOROLOGY.\*****JULY, 1929.**

July, 1929, was dry over most of England with much sunshine in the south and east. The mean temperature for the month was in most districts above the normal but the excess was small as a rule. During the first few days, unsettled weather prevailed generally with some very heavy falls of rain (81 mm. at Bungay, Suffolk, and 76 mm. at Felixstowe on the 3rd). Low temperatures in the screen were recorded in many places in the mornings of the 1st and 2nd. On the 6th a wedge of high pressure advanced over the country and fine weather was experienced generally. The lowest night temperatures of the month occurred in most districts early on the 8th. Following a further spell of unsettled weather an anticyclone spread over the country on the 12th and there was a succession of days of unbroken sunshine with high temperature. The hottest period in most districts extended from the 14th to the 16th but in the south-east most places recorded their highest temperature on the 20th when 90°F. was recorded at Greenwich and 89°F. at Camden Square, London. Thunderstorms occurred in many places in eastern England on the 16th and in the south on the 20th when heavy falls of rain were recorded during the space of an hour, 45 mm. fell at Rickmansworth and 40 mm. at Hampstead. After the 20th conditions became cyclonic, considerable falls of rain occurring in the west. From the 24th to the 27th winds were mainly from N.W. to N. with a general return to finer weather. Heavy rain occurred widely on the 28th and in many districts especially in the south-west, the 28th was the wettest day of the month. The month closed with generally showery weather and strong winds.

**AUGUST.**

August, 1929, was mainly fair and dry and in most districts the mean temperature was within a degree of the normal. Apart from a well-defined excess in the north-west and extreme north, rainfall totals were almost everywhere below the normal; over a broad area including Norfolk and the greater part of Lincolnshire and extending south-westwards to include parts of Berkshire and Hampshire less than half the normal rainfall was recorded. Sunshine aggregates exceeded the normal in the south-east but elsewhere there was a deficiency which was greatest in the north-west.

Conditions were very unsettled and cool during the first week with frequent rain, heavy falls occurring on the 3rd, 4th, 5th, 6th and 7th (107 mm. at Princetown, 89 mm. at Winscombe, Somerset, on the 3rd). By the 7th the weather had become more settled, especially in the east and south-east, where practically no rain fell from the 8th to the 15th. By the 10th the temperature had risen above the normal and from the 12th to the 15th abundant sunshine was recorded. On the 16th a break in the fair weather occurred in the south-east. Rain was widespread on this date, heavy falls with thunder occurring locally. Subsequently winds were mainly

---

\* Furnished by the Director of the Meteorological Office.

westerly with intermittent rain or showers chiefly in northern and western districts. Fine, warm weather was widely experienced on the 25th when over 12 hours' sunshine was recorded in many places. Apart from rain and thunder in a few places on the 31st the weather continued fine until the end of the month. The highest day temperatures were recorded in most districts during the last five or six days and in the east and south the temperature rose to 80°F. and over on the 27th and again on the 31st when 90°F. was recorded in London and at Margate.

#### SEPTEMBER.

September was on the whole fine, warm and abnormally dry. Winds were mainly south-westerly to north-westerly and light to moderate in force but strong winds or gales were general on the 20th and 21st. During the first half of the month, unusually high temperatures were recorded, maximum temperatures in the neighbourhood of 80°F. being frequently recorded in parts of the southern Midlands and the south-east. The hottest days occurred generally during the period 4th to the 9th and on the 12th; 89°F was recorded in London on the 4th and 8th and 90°F. at Newport (I. of Wight) on the 5th. Night temperatures were, as a rule, above the normal and during the first few days of the month did not fall below 60°F. in several southern districts. Ground frosts occurred locally about the 16th and on the 25th and 26th. There was a pronounced deficiency of rainfall, the general precipitation over England and Wales, expressed as a percentage of the normal for the period 1881-1915, amounting to only 37 per cent. Since at least 1881 there have been only two drier Septembers, viz. those of 1907 and 1910. The drought was most intense in the Midlands and the south-west where some places had no appreciable rain until the 29th or 30th when rain became general over the whole country. At Richmond (Kew Observatory) and Ross-on-Wye the month was the driest September since at least 1866 and 1865 respectively. Thunderstorms occurred locally on the 1st, 3rd, 12th, 17th and 18th. On the 17th the storms were severe in the Channel Islands, Jersey reporting 71 mm. rain during the 24 hours commencing 17h. on the 16th. Sunshine aggregates for the month exceeded the normal. Amongst large daily amounts were 12·4 hours at Hastings and 12·1 at Falmouth on the 8th and 12·0 hours at Brighton on the 2nd.

\* Excluding non-civilians.

† The populations relate to 1929, except in the case of Belfast, which is the Census figure of 1926, yearly estimates having been discontinued. Deaths in Edinburgh and Glasgow are provisionally corrected by the deduction of deaths of non-residents domiciled in Scotland and by the addition of deaths of residents reported from elsewhere in Scotland. Births are similarly corrected. Deaths in Dublin Registration Area and Belfast are corrected by the exclusion of deaths of persons admitted into public institutions from without the respective areas, and in the case of Belfast by the inclusion of certain institutional deaths occurring elsewhere. The figures for Edinburgh and Glasgow relate to the calendar quarter.

‡ Including 4 deaths from small-pox.

§ As altered 1st October, 1928.

|| Including 1 death from small-pox.

Table VI.—157 SMALLER TOWNS } POPULATION, BIRTHS, and DEATHS for Quarter  
(Adjusted populations 20,000- } ended 30th September, 1929.

\* For statistics of other Colonial and Foreign Cities during the First Quarter of 1929, see Quarterly Return for that period.  
† The deaths in this column relate to all ages for Bombay, Madras, Oslo (Christiania), and to children under 1 year of age for Copenhagen, Stockholm, Gothenburg, the German Cities, Cairo, and Alexandria.  
‡ Including 2 deaths from Cholera in Bombay, 3 in Madras, 309 in Calcutta and 2 from Plague in Bombay.  
§ Including deaths from Croup in Bombay, Paris, Antwerp, Budapest, Warsaw and Rio de Janeiro.  
¶ The estimated population and deaths refer to the civilian population only.  
‡ The registration of Births in Bombay is incomplete.

## EXPLANATORY STATEMENT.

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c. The live births and deaths for the towns in Tables III., V., VI., X., XI., XII. and XIII. have been provisionally corrected by the exclusion of those not belonging to the town and as far as possible by the inclusion of those belonging to the town but occurring in other areas. These figures may not correspond exactly with the revised figures published later in the Statistical Review.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

---

Table I. shows, for England and Wales, the Marriages, Births and Deaths for the 10 years preceding, and for each quarter of those years.

Table II. shows the Annual Rates calculated on the above.

Table III. shows the Birth and Death Rates and Analysis of Mortality during the last 5 quarters, in (a) England and Wales, (b) 107 County Boroughs and Great Towns, and (c) Smaller Towns with adjusted populations 20,000-50,000 in 1921.

Table IV. shows the Births, Deaths (distinguishing deaths of Infants under one year) in the Quarter under review for Administrative Counties with the Associated County Boroughs, and Table IVa. the Marriages in the preceding Quarter in England and Wales by Registration Counties.

Table V. shows, for the 107 County Boroughs and Great Towns and the Metropolitan Boroughs, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) and the corresponding annual rates for the 13 weeks ended 28th December, 1929.

Table VI. shows, for the 157 Smaller Towns, the Births and Deaths (distinguishing certain causes and deaths of Infants under one year) for the quarter ended 31st December, 1929.

Table VII. shows the Births and Deaths (distinguishing certain causes) and death-rates in London and in certain cities in the British Empire and in foreign countries, in the last available quarter.

Table VIII. is a summary of returns of Notified cases of Infectious Diseases for the 13 weeks ended 28th December, 1929. These figures are included in the present publication by arrangement with the Ministry of Health, in pursuance of Section 5 of the Census Act, 1920.

Table VIIIa. shows the local distribution of the cases of small-pox notified during the 13 weeks ended 28th December, 1929.

*Note*.—The returns for the quarters ending 30th June and 31st December respectively contain lists of the changes of boundaries of administrative and poor law areas during the six months ending on these dates, that for the quarter ending 30th September a table relating to summer mortality in London from diarrhoea and enteritis, and that for the quarter ending 31st December a summary of certain figures for the year.

---

## NOTES ON THE FOURTH QUARTER OF 1929.

## ENGLAND AND WALES.

*Births.*

The live Births registered in the *Fourth* Quarter of 1929 numbered 150,496 and were 13,433 less than in the preceding Quarter, and 5,173 below the number recorded in the corresponding Quarter of 1928. The illegitimate live Births totalled 6,289, or 388 less than the number shown in the Return for the Fourth Quarter of 1928.

Of these 150,496 live Births 76,690 were males and 73,806 females giving a proportion of 1,039 males to 1,000 females; the average proportion in the 10 preceding Fourth Quarters was 1,048.

The live Births registered in the Quarter correspond to an annual rate of 15·1 per 1,000 of the estimated mid-year population for the year 1929, or 0·6 per 1,000 below that recorded in the corresponding Quarter of 1928. It is the lowest rate recorded in any quarter, being 0·3 below that of the fourth quarter of 1927, the lowest previously reached.

The number of Stillbirths, the corresponding annual rate per 1,000 population, and the percentage of the total Births registered during the last ten Quarters are shown below.

Quarter.	Number.	Annual rate per 1,000 population.	Percentage of total births registered.
Sept., 1927 ...	6,198	0·63	3·6
Dec. " ...	6,388	0·65	4·0
March, 1928 ...	7,077	0·72	4·0
June " ...	7,126	0·73	4·0
Sept. " ...	6,617	0·67	3·8
Dec. " ...	6,747	0·68	4·2
March, 1929 ...	6,891	0·71	4·1
June " ...	6,917	0·70	3·9
Sept. " ...	6,559	0·66	3·8
Dec. " ...	6,451	0·65	4·1

*Deaths.*

The Deaths (excluding stillbirths) registered numbered 112,712 and were 15,953 more than in the preceding Quarter, but 2,921 less than in the corresponding Quarter of 1928. They comprised 58,338 males and 54,374 females, a proportion of 1,073 males to 1,000 females. The death-rate was 11·3 per 1,000 of the estimated population or 0·4 per 1,000 below that recorded during the fourth Quarter of last year.

The Mortality of infants under one year of age was equal to 69 per 1,000 registered live births. This rate was 6 per 1,000 below the average of the 10 preceding Fourth Quarters.

### Urban Mortality.

The highest death-rates from certain epidemic diseases in the 107 Great Towns (Table V.) last quarter were as follows :—

From *measles* 0·31 in Oldham, 0·40 in South Shields, 0·43 in Wakefield, 0·50 in Preston, 0·71 in Merthyr Tydfil and 1·59 in Wigan; from *whooping cough* 0·20 in Chester, 0·21 in Liverpool, 0·22 in Aberdare, 0·26 in Grimsby and 0·38 in Dewsbury; from *diphtheria* 0·31 in Rochdale, 0·34 in Tottenham, 0·37 in Aberdare, 0·43 in Tynemouth, 0·49 in Chester, and 0·71 in Merthyr Tydfil; from *influenza* 0·43 in Carlisle, 0·46 in Middlesbrough, 0·50 in Newport (Mon) and 0·51 in Barnsley.

Of the 23 deaths from *enteric fever* which occurred in London during the quarter, 15, representing a death-rate of 0·30, are assigned to the Met. B. of Lewisham.

The highest death-rates per 1,000 live Births from *diarrhœa* and *enteritis* among children under two years of age were 30·5 in West Ham, 33·0 in Sunderland, 37·0 in Middlesbrough, 38·2 in Hull and 61·1 in Salford.

### Small-pox.

During the Quarter small-pox was mentioned as a cause of death in three cases, which have been provisionally classified to small-pox and assigned to Poplar (Met. B.), Bolton C.B. and Rawmarsh U. D.

A supplementary table (VIIIa.) showing the distribution of the cases of small-pox notified during the 13 weeks ended 28th December, 1929, is given on pp. 24 and 25.

### NATURAL INCREASE OR DECREASE.

The natural *increase* of population by excess of Births over Deaths was 37,784 as against increases of 45,718, 36,550, and 40,036 in the Fourth Quarters of 1926, 1927 and 1928.

### NOTES ON MARRIAGES.—Third Quarter, 1929.

The number of *persons* married in the *Third* quarter of 1929 in England and Wales was 201,180, an increase of 50,216 on the number in the preceding Quarter and 12,224 more than that in the corresponding quarter of 1928. The number corresponds to an annual rate of 20·2 per 1,000 of the estimated mid-year population, the highest rate recorded since the third quarter of 1920 when the abnormal rate of 23·2 was reached.

### UNITED KINGDOM AND IRISH FREE STATE.— Second Quarter, 1929.

In Great Britain and Ireland 216,003 births and 150,126 deaths were registered in the three months ended 30th June, 1929. The increase of population owing to the excess of births over deaths was therefore 65,877. The number of persons married was 177,444.

For facts, in detail, concerning Scotland, Northern Ireland, and the Irish Free State, reference should be made to the Returns published by their respective Registrars-General.

## SUMMARY 1929.

The Summary relating to the year 1929 giving the principal Tables published up to 1912 in the "Annual Summary," will be found on pages 26-41 of this publication, the Tables being numbered IX-XV.

### ENGLAND AND WALES.

According to the quarterly returns furnished by local registrars, 644,218 live births and 532,525 deaths (excluding stillbirths) were registered in England and Wales in the year 1929. The natural increase of population, by excess of births over deaths, was, therefore 111,693, the average annual increase in the preceding five years having been 220,928. The number of persons married during the year was 312,982.

Provisional rates for England and Wales in 1929 per 1,000 of the estimated population at the middle of the year, were as follows :—

Marriage-rate ...	15·8
Live Birth-rate ...	16·3
Death-rate ...	13·4

The number of stillbirths per 1,000 total births (including stillbirths) was 40 and infant mortality was 74 per 1,000 live births. The birth-rate was the lowest recorded being 0·3 below that for 1927 the previous lowest record; while the death-rate was the highest since 1919 and the infant mortality the highest since 1925. The high death-rate and infant mortality rate were largely due to influenza and also to the high mortality from respiratory and circulatory diseases occurring during the spell of abnormally cold weather experienced throughout the country in February and early March.

The marriage-rate of 15·8 is 0·4 per 1,000 above that for last year and is the highest recorded since 1921 (16·9).

A provisional statement of the birth-rate and an analysis of the mortality during the year in England and Wales, London, and in the groups of towns is given in Table X; and Table XI shows the provisional birth-rate, death-rate (from all causes and from various causes), and infant mortality during the year in each of the Metropolitan Boroughs and 107 Great Towns.

**METEOROLOGY.\*****OCTOBER, 1929.**

October was unsettled wet and windy with, however, considerable bright periods. During the first half of the month maximum temperatures were about or above the normal, the mildest spell occurring during a period of anticyclonic weather between the 11th and the 16th when the temperature approached or exceeded 65°F; 66°F was recorded at Ross-on-Wye on the 11th and 12th and 67°F at South Farnborough and Shoeburyness on the 16th. The second half of the month was on the whole less mild and during the last week the nights were mostly cold, temperatures about or below freezing point being recorded in northern districts on the mornings of the 26th, 27th, 28th and 31st. Monthly mean temperatures were above the normal in most districts though the departures from normal in most cases did not exceed 1°F. Rainfall totals were appreciably below the normal in the north-east but in most other districts there was an excess; in western districts there was a substantial excess, monthly totals exceeding one and a half times the normal in many places in the north-west and extreme south-west of England and locally in western Wales. Although wet and windy, there were considerable bright periods and in almost all districts sunshine aggregates exceeded the normal; 145 hours were recorded at Lowestoft and 128 hours at Hoylake, these totals being respectively 32 and 36 hours more than the normal.

**NOVEMBER.**

The outstanding feature of the month's weather was the pronounced excess of precipitation in southern districts where the month was the wettest November and in a few places, e.g. at Falmouth, Ashburton and St. Austell, the wettest month of any name during the last 60 years. At Ross-on-Wye the month was the wettest since 1818. Over England and Wales as a whole the month was the wettest November on record. More than two and a half times the normal rainfall was recorded over most of Wales and the south and south-west of England, as much as three and a half times the normal being recorded in parts of Devon, Dorset and Sussex.

The month was mostly mild, particularly during the last ten days and in all districts, mean temperatures exceeded the normal. The excess, however, was slight owing to the occurrence of many cold nights early in the month and to a spell of cold weather from the 12th to the 18th. The prevailing winds were south-westerly and frequently strong, severe gales occurring on the 10th-11th and 24th-25th. In spite of the unsettled and wet weather sunshine aggregates exceeded the normal, except in the north-west and in Wales.

**DECEMBER.**

December was very unsettled, stormy and wet with, however, frequent sunny intervals. Apart from a spell of wintry weather from about the 17th to the 22nd, during the last few days of which

---

\* Furnished by the Director of the Meteorological Office.

snow fell in many districts, the month was mild and in all districts monthly mean temperatures were above the normal. Unusually high temperatures for the time of year occurred at the beginning and about the middle of the month; at Richmond the maximum temperature of 58°F recorded on the 14th has only once been equalled in December since at least 1871, viz. in Dec. 1918. Monthly totals of rainfall everywhere exceeded the normal and over large areas there was extensive flooding. Few districts had less than one and a half times the normal and many more than twice the normal. The month was the wettest December at Ross-on-Wye since 1876, at Meltham (Yorks) since at least 1881 and at Teignmouth since 1915. Heavy daily falls were frequent, amongst the most noteworthy being 84 mm. at Rosthwaite (Cumberland) on the 28th, 54 mm. at Dean Prior (Devon) on the 4th and 52 mm. at Rhayader (Radnor) on the 6th. Perhaps the most memorable feature of the month's weather was the strong winds and gales that affected most districts during the period 5th to 12th and on the 20th-21st, 24th-25th and 28th-29th. The gales were most severely felt in the south-west, the wind frequently exceeded 80 miles per hour in gusts and at Scilly attained 111 miles per hour on the 6th, the highest velocity on record in England and Wales. The gales caused much material damage and some loss of life. Sunshine aggregates for the month were markedly in excess of the normal.

\* Excluding non-civilians.

† The populations relate to 1929, except in the case of Belfast, which is the Census figure of 1926, yearly estimates having been discontinued. Deaths in Edinburgh and Glasgow are provisionally corrected by the deduction of deaths of non-residents domiciled in Scotland and by the addition of deaths of residents reported from elsewhere in Scotland. Births are similarly corrected. Deaths in Dublin Registration Area and Belfast are corrected by the exclusion of deaths of persons admitted into public institutions from without the respective areas, and in the case of Belfast by the inclusion of certain institutional deaths occurring elsewhere. The figures for Edinburgh and Glasgow relate to the calendar quarter.

‡ As extended 1st October, 1929.

¶ Including 1 death from small-pox.

Table VI.—157 SMALLER TOWNS } POPULATION, BIRTHS, and DEATHS for Quarter  
(Adjusted populations 20,000— } ended 31st December, 1929.

\* For statistics of other Colonial and Foreign Cities during the Third Quarter of 1929, see Quarterly Return for that period.

† The deaths in this column relate to all ages for Bombay, Madras, Oslo, and to children under 1 year of age for Copenhagen, Stockholm, Gothenburg, the German Cities, Cairo, and Alexandria.

‡ Including 469 deaths from Cholera in Calcutta and 2 in Madras; and 1 from Plague in Bombay.

§ Including deaths from Croup in Bombay, Paris, Antwerp, Budapest, Warsaw and Rio de Janeiro.

¶ The estimated population and deaths refer to the civilian population only.

¶ The registration of Births in Bombay is incomplete.

\* The Births and Deaths in this Table are the numbers registered, without correction for inward and outward transfers, and for London differ from those in Tables XI, XIII, and XV.

Table X.—**Birth-rate, Death-rate, and Analysis of Mortality** during the year 1929.

(Provisional figures. The rates for England and Wales have been calculated on a population estimated to the middle of 1929, but those for the towns have been calculated on populations estimated to the middle of 1928. The mortality rates refer to the whole population as regards England and Wales, but only to civilians as regards London and the groups of towns.)

	RATE PER 1,000 TOTAL POPULATION.		ANNUAL DEATH-RATE PER 1,000 POPULATION.										RATE PER 1,000 LIVE BIRTHS.		PERCENTAGE OF TOTAL DEATHS.			
	Live Births	Still-births.	All Causes.	Enteric Fever.	Small-pox.	Measles.	Scarlet Fever.	Whooping Cough.	Diphtheria.	Influenza.	Violence.	Diarrhoea and Enteritis (under two years).	Total Deaths under One year.	Certified by Registered Medical Practitioners.	Inquest Cases.	Certified by Coroner after P.M. No Inquest.	Uncertified Causes of Death.

\* Excluding non-civilians.

† The populations relate to 1929, except that of Belfast, which is the Census figure of 1926, yearly estimates having been discontinued. Deaths in Edinburgh and Glasgow are provisionally corrected by the deduction of deaths of persons domiciled in Scotland and by the addition of deaths of residents reported from elsewhere in Scotland. Births are similarly corrected. Deaths in Dublin Registration Area and Belfast are corrected by the exclusion of deaths of persons admitted into public institutions from without the respective areas and in the case of Belfast by the inclusion of certain institutional deaths occurring elsewhere. The figures for Edinburgh and Glasgow relate to the calendar year.

§ Deaths from small-pox are included as follows:—Greater London 13, Outer Ring 7, 17 Great Towns in Outer Ring 7.

¶ As extended 1st October, 1929.

\* The hours of observation are 9 a.m. and 9 p.m. local time.

† The normals used are obtained from observations extending over 35 years (1881-1915).

Pressure is expressed in millibars (1000 mb. = 29.531 mercury-inches). Wind Force.—The Summary is obtained from the records of a cup anemograph having 5 in. cups and 15 in. arms. The factor used is 3. Winds above 43 miles per hour are reckoned as gales and winds between 21 and 43 miles per hour as moderate or strong winds. Direction is not tabulated when the speed of the wind is less than 5 miles per hour and winds of less than that velocity are counted as calm.

Table XIV—continued.

† A day is reckoned as "generally clear," if the average of the estimates of the fraction of sky covered by cloud at 9 a.m., 3 p.m., and 9 p.m. is less than .2, and as "generally overcast" if the average is greater than .8. Days persistently cloudless and days persistently overcast refer to the period midnight to midnight.

Table XV.—BIRTHS and DEATHS in LONDON and in certain CITIES in the BRITISH EMPIRE and FOREIGN COUNTRIES, 1929.

Note.—The figures in this table are compiled from the weekly returns.

CITIES.	POPULATION (estimated).*	Births (exclud- ing stillborn).	Stillbirths.	Live Birth - rate per 1,000 living.	DEATHS (exclud- ing stillborn).	Death - rate per 1,000 living.	Deaths of Infants under 1 year of age.	Rate per 1,000 Live Births.	PRINCIPAL EPIDEMIC DISEASES.							Diarrhoea and Enteritis (under 2 years).**

\* These populations relate as far as possible, to the middle of the year. They differ in some cases from those in Table VII.

† The estimated population which is that for the middle of 1927 and deaths for London refer to the civilian population only.

‡ Including deaths from group in Bombay, Paris, Antwerp, Budapest, Warsaw, and Rio de Janeiro.

\*\* The deaths in this column relate to all ages for Bombay, Madras, and Oslo (Christiana), and to children under 1 year of age for Copenhagen, Stockholm, Gothenburg, and the German cities.

§ Including 2,578 deaths from cholera in Calcutta, 8 in Bombay and 19 in Madras, and 27 from plague in Bombay.

¶ The Registration of Births in Bombay is incomplete.

1 October	M. of H. Provisional Order Confirmation (Middlesbrough Extension) Act, 1929.	Middlesbrough R.D.— Marton C.P.	Middlesbrough C.B. and C.P.	28	—	—

- NOTES.—(a) By an Order of the West Sussex County Council, which took effect 28th July, 1929, Bognor U.D. was renamed "Bognor Regis".
- (b) By an Order of the Dorset County Council, which took effect 7th August, 1929, the name of Chickereil (or West Chickereil) Civil Parish was declared to be "Chickereil".
- (c) By an Order of the Yorkshire-East Riding-County Council, which took effect on the 1st November, 1929, the name of North Burton (or Burton Fleming) Civil Parish was declared to be "Burton Fleming".
- (d) By a Charter of Incorporation, which took effect 9th November, 1929, Walthamstow Urban District became a Municipal Borough.
- (e) By M. of H. Order No. 73,815 (the North Riding of Yorkshire (Danby and Glaisdale) Confirmation Order, 1929), which took effect 15th November, 1929, the extent and boundaries of the Civil Parishes of Danby and Glaisdale were defined and consequently the areas of the Rural Districts and Unions of Whitby and Guisborough were also affected. No population was involved and the altered acreages are as follows :—

	<i>Acreage</i> ( <i>Land and Inland Water</i> ).
Guisborough Rural District	...
Guisborough Union	44,757
Whitby Rural District	78,396
Whitby Union	87,421
Danby Civil Parish	91,021
Glaisdale Civil Parish	12,200
	10,806

The "Lands Common" to Danby and Glaisdale Civil Parishes (11,834 acres in extent) became divided between the two Civil Parishes.
